Createspace Independent Publishing Platform, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This book raises questions about the legacy of eugenics in contemporary state of reproductive health law - linking the past to recent developments in population control. It presents a comprehensive etiological classification of mental illnesses stratified for the genotype (autosomal-dominant, autosomal-recessive, x-linked and y-linked transmissions; triplet repeat disorders, exon and intron mutations), behavioral phenotype, post-traumatic reactions, spatial orientations, histone disorders, and acquired comorbidity. Of the 40 individuals defined as mentally incompetent, 87.5 suffer various degrees of congenital cognitive deficits, and 12.5 have acquired mental illness after the brain damage either in a car accident or intrapartum - during the traumatic birth. The mean age is 20.78 years in females, and 30.25 years in males. A substantial portion...
