Excerpt from Fourth National Conference on Wheat Utilization Research: Held at Boise, Idaho, November 3-5, 1965 Another important aspect, in the Foundation as with any similar organization, is the problem of keeping members informed. All of us who are active in organizations know that sometimes the job of advising members what has been done looms as greater than merely doing what should be done. Or, at least it seems to be the more important job of the moment. And here, too, we would have another task. The maintenance of a Bureau for Public Information, and the dissemination of information, both about the Foundation's program and special activities, would reside in this area of Operation. Change the name Wheat and Wheat Foods to Corn or Milk and Dairy Foods or any name for any other commodity or group of food products you wish, and the basic elements of the program will remain the same. The knowledge and experience of hundreds of competent, skillful, talented people have gone into building this pattern for a basic program. We can adapt and modify to our own advantage any one or many of the elements from similar programs operated in behalf of a dozen or more basic commodity groups. The basic program is the crux. It is the foundation of the Foundation, so to speak—including the elements which almost any person knowledgeable in such areas of human endeavor might recommend.
