Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Watch Factories of America: Past and Present HE term watchmaker, in America, does not necessarily imply one who manufactures watches, but is more generally applied to those who make a business of repair ing and cleaning time pieces. In days gone by, a watch maker was a mechanic of no mean order, capable of making and fitting any part of a watch, no matter what make the watch might have been or how complicated its construction, which through negligence on the part of the owner became deranged or broken. To-day, a watchmaker need be possessed of only ordinary mechanical skill and intelligence in order to repair any watch of American manufacture, and all this change has come about by the manufacturers of the various movements working on the interchangeable system, first applied to watchmaking in America by Mr. Aaron L. Dennison in 1850. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
