Reviews

*Undoubtedly, this is actually the very best job by any writer. It is loaded with wisdom and knowledge You will not really feel monotony at anytime of your respective time (that's what catalogs are for concerning when you check with me).
(Prof. Lawson Stokes IV)*

A DISCUSSION OF SOME OF THE PRINCIPLES OF ACOUSTICAL INSULATION (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Discussion of Some of the Principles of Acoustical Insulation Total transmittance T equals a Noise reduction factor (in decibels) $10 \log 1071 =$ decibels. From the last. Column in the above table it may be seen that the windows admit several times the amount of sound admitted by all of the wall and ceiling structures and that the door admits more noise than either the walls or ceiling. Suppose one window were opened so there was 1 square foot of Open window. The transmission loss through an Opening like this is zero, hence $\tau = 1$ and $\tau_a = 1$. In other words, an Opening of 1 square foot would transmit four times the sound energy that is transmitted by the entire structure with closed windows. The noise reduction factor with the oparty opened windows is diminished to 26. 8 decibels. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
