INTER-IMAGE STATISTICS FOR MOBILE ROBOT ENVIRONMENT MODELING

VDM Verlag Dr. Mueller e.K. Paperback Condition: New. 184 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. This book presents a statistical learning framework for inferring geometric structures from images. The proposed framework computes dense range maps of locations in the environment using only intensity images and very limited amount of range data as an input. This is achieved by integrating and analyzing the statistical relationships between the visual data and the available depth on terms of small patches. The scientific issue...
