SOLUTION OF RESTRICTED TWO-DIMENSIONAL FABRIC CUTTING PROBLEM

Solution of restricted two-dimensional fabric cutting problem

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | This book presents the application of a mathematical model in the process of decision-making on the subject of components supply of an APS (Advanced Planning System) production-programming model in a textile garment industry. This is the report of the Research Project: Information Technologies for the integration of manufacturing, with emphasis on production scheduling. The objective is to integrate and manage the manufacturing materials supply from the cutting process, having as a principle...

Reviews

This publication is definitely worth getting. I actually have go through and so i am sure that i will gonna read through again yet again later o n. I am just quickly can get a satisfaction of looking at a created pdf.

-- **Hailee Armstrong I**

Most of these pdf is the ideal pdf available. It is definitely basic but shocks within the 50 percent of your book. I am just easily could get a delight of reading through a written book.
