

Electronic circuit design technology experiments and tutorials (Electronic Information in the 21st century higher education planning materials)

Filesize: 6.88 MB

Reviews

It in a single of the most popular ebook. Indeed, it can be play, still an interesting and amazing literature. I am quickly will get a satisfaction of reading a created pdf.

Date :2011-08-01 version 1. Editor of this book by He Ping's experimental electronics and circuit design tutorial is the technical experiments and electronic circuit design teaching materials. including experimental overview. circuit technology (including signal and system) experiments. analog electronics (including the high-frequency. low frequency) test. digital electronics experiments. electrical technology experiments. appendix six. Covers the verification experiment. a comprehensive experimental and experimental design (basic design. integrated design). appendix provides some information about the experiment. While most of the experimental arrangement of the basic design of the experiment content. given a specific design methods and reference circuit. in order to cultivate students' creative thinking and ability. This electronic circuit design technology experiments and tutorials not only as a power class of undergraduate higher education. non-electric specialty experimental materials. but also as High Commissioner and the relevant professional adult education materials are also available for experiments in Electrical Information electronic design and development of engineering and technical personnel for reference. Contents: Introduction to a first experiment. an overview of two experiments. the basic requirements of three experimental teaching. measurement error and experimental data processing four experimental measurements and ground 5. open laboratory experiments with the optional note six. with laboratory safety second circuit power requirements. signal and system test a circuit element commonly used in experiments with the use of two DC multimeter research and testing of the circuit - the superposition principle. proportionality and potential Experiment 3. the DC circuit research and testing of the two - Thevenin's theorem. Kirchhoff's law experiment four characteristics of a controlled source experiment five volt-ampere characteristics of research and experiments over six ranges Measurement System (System Design Multisim)...
