

Year Book of the Pennsylvania Society 1920

Filesize: 5.93 MB

Reviews

A whole new eBook with a brand new point of view. It is really simplistic but surprises in the fifty percent of the publication. I am just effortlessly can get a delight of looking at a written ebook.

(Mariano Gleichner)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 108 pages. Original publisher: Cincinnati, Ohio : National Risk Management Research Laboratory, Office of Research and Development, U. S. Environmental Protection Agency, 1995. OCLC Number: (OCoLC)34308193 Subject: Drinking water -- Copper content. Excerpt: . . . tiers, leading to the interesting possibility that a water supplier may pass the regulatory action level requirement, but may still have a copper solubility problem. Nonetheless, several interesting gross-scale trends have been discerned for large water systems. There is a poor correlation between 90-percentile lead and copper levels. Another trend is that copper exceedences tended to be highest at very low alkalinities (25 mg CaCO L) and in systems creasingly greater over 75 mg CaCO L. Finally, no action level exceedences were reported for 3 systems having a pH above approximately 8. The data thus far suggest that cuprosolvency will be a major concern across the United States, especially for smaller water suppliers that are less likely to employ corrosion control and use groundwater sources. Further, the poor correlation between reported 90-percentile lead and copper levels suggests that different control strategies for copper than those considered appropriate for lead may need to be developed or employed by affected utilities. Understanding how copper will respond to lead control measures and the results of other regulatory treatment requirements is therefore of considerable interest. Indeed, a response that effectively controls lead corrosion might exacerbate copper corrosion. Moreover, a utility must distribute aesthetically-pleasing water. A good example of the conflicts between control of corrosion of iron mains and reducing copper corrosion rates has been given for a study in Vancouver, BC. Historical Framework While many previous papers and book sections have been published concerning copper corrosion, the focuses of...
