LEARNING AND PROBABILISTIC METHODS FOR VISUAL SERVOING AND TRACKING AN OPTIMIZATION APPROACH

Scholars' Press. Paperback Condition: New. 236 pages. Dimensions: 8.7in. x 5.9in. x 0.5in. The long term dream of robotic research is to develop systems with the abilities to carry out tasks in highly complex and dynamic everyday environments like home or office. To realize this dream, it is important to improve the sensory capabilities of the robots. Vision has proved to be the most versatile sensor for robotic applications. Computer vision algorithms have successfully been used to control a variety of...
