But as soon as he says something, passes on information in an altered form, or merely expresses an attitude--he becomes a reference point. He can be marked, measured and entered on a graph. His actions can be grouped with others and the action of the group measured. Man--and his society--then becomes a systems problem that can be fed into a computer. We ve cut the Gordian knot of the three-L s and are on our way towards a solution. * * * * * Stop! Costa said, raising his hand. I was with you as far as the 3L s. What are they? A private code? Not a code--abbreviation. Linear Logic Language, the pitfall of all the old researchers. All of them, historians, sociologists, political analysts, anthropologists, were licked before they started. They had to know all about A and B before they could find C. Facts to them were always...
