Analytic-Bilinear Approach to Integrable Hierarchies (Hardback)

By L.V. Bogdanov

Springer, Netherlands, 1999. Hardback. Condition: New. 1999 ed.. Language: English . Brand New Book ***** Print on Demand *****.The subject of this book is the hierarchies of integrable equations connected with the one-component and multi component loop groups. There are many publications on this subject, and it is rather well defined. Thus, the author would like to explain why he has taken the risk of revisiting the subject. The Sato Grassmannian approach, and other approaches standard in this context, reveal deep mathematical structures in the base of the integrable hierarchies. These approaches concentrate mostly on the algebraic picture, and they use a language suitable for applications to quantum field theory. Another well-known approach, the α -dressing method, developed by S. V. Manakov and V.E. Zakharov, is oriented mostly to particular systems and exact classes of their solutions. There is more emphasis on analytic properties, and the technique is connected with standard complex analysis. The language of the α -dressing method is suitable for applications to integrable nonlinear PDEs, integrable nonlinear discrete equations, and, as recently discovered, for the applications of integrable systems to continuous and discrete geometry. The primary motivation of the author was to formalize the approach to inte...

Reviews

The very best pdf i at any time read through. This is for all those who statte there had not been a worthy of studying. You wont sense monotony at whenever you want of your own time (that's what catalogs are for concerning when you request me).

-- **Fabian Kuhlman II**

These types of publication is the best book available. it absolutely was writtern very completely and helpful. I am very happy to explain how here is the greatest book we have study within my individual existence and can be he greatest publication for possibly.
