

Serial Dating.at 60 (Paperback)

By Bob Moody

Createspace, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The author describes his personal two and a half year journey through internet dating with a true accounting of many of the seventy three women he met for over one hundred seventy dates. A humorous look at a sixty year old man trying to find love electronically where people have the freedom to post deceptively old photos of themselves and lie about their age, among other things. Along the way, he dumps and gets dumped a number of times, learning the hard way that dating on the net is not for the impatient or the faint of heart. You ll learn of the perils of shopping at the candy store too often while being too impetuous. If you are a past or present participant in the crapshoot that is internet dating, you will also meet some characters whose behavior might mirror some of your own experiences. Serial daters get a bad rap but, short of finding someone special early on in the process, there s no other way to effectively navigate this minefield without becoming one.
