

Douglas D-558-2 Skyrocket

By Scott Libis

Ginter Books. Paperback. Book Condition: New. Paperback. 88 pages. Dimensions: 10.8in. x 9.1in. x 0.2in. Comic book stuff was the typical response on one would draw in 1938 when the subject of rocket propulsion came up. To most, the subject of rocket power conjured up images of Buck Rogers and the Saturday afternoon matinee. Rocketry was the flight of fantasy science fiction writers used to transport their audiences to new worlds. But it was also during this time that visionaries like Dr. Robert Goddard and Dr. Theodor Von Karman worked developing their theories of rocket science. The D-558 program was a Douglas Aircraft Company contract with the U. S. Navy and NACA (National Advisory Committee for Aeronautics), intended to produce an aircraft for the purpose of exploring transonic and supersonic flight. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.

Reviews

Simply no terms to explain. I am quite late in start reading this one, but better then never. Its been written in an remarkably easy way and is particularly merely soon after i finished reading this book where basically changed me, affect the way i really believe.

-- Prof. Jedediah Kuhic DVM

Basically no words to describe. It is filled with knowledge and wisdom I am just pleased to let you know that this is actually the greatest publication i have read within my individual lifestyle and may be he best publication for at any time.

-- Prof. Ron Gaylord II
