Interesting statistical tables and a selected bibliography. Choice Gender, like race and ethnicity, is an increasingly important factor in assessing social policy in the U.S. For those who want to understand the role of gender in the poverty problem today, Women s Life Cycle and Economic Insecurity provides a splendid collection of articles containing new knowledge and fresh insights. Sheila B. Kameron Columbia University School of Social Work According to a global United Nations study, women perform 66 percent of all work, but receive only 10 percent of all income and own less than 1 percent in material assets. Although the economic status of American women has been somewhat higher than that of women globally, it is increasingly apparent that the United States is facing the emerging social problem of women s economic insecurity in the...
