Springer. Hardcover. Condition: New. 400 pages. While the study of cultures effect on psychological processes has been a topic of interest for over 100 years, the neuroscientific study of culture is a recent development. However, the current emphases in the neurosciences on neural plasticity, epigenetics and brain imaging has begun to allow for the understanding that our environment can produce measurable changes to both the structure and function of the brain. It is within this climate that the groundwork is set for the study of the neuroscience of culture. How does ones culture affect the brain and how do these changes produce differing psychological processes This volume features the worlds leading researchers in this emerging field. The book offers a wide view of the field by having chapters focus on topics as diverse as empathy, bilingualism, person perception, social relations, and memory. With a focus on using the most recent empirical findings and theoretical developments, this book seeks to guide the development of this emerging field. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
