

Molecular Biology Techniques for Biomolecules

By Iqbal, Muhammad Naeem / Mughal, Naz

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Molecular Biology Techniques for Analysis of Biomolecules and Diagnosis | A biomolecule is any molecule that is produced by a living organism, including large macromolecules such as proteins, polysaccharides, lipids, and nucleic acids, as well as small molecules such as primary metabolites, secondary metabolites, and natural products. This book describes application of various techniques like polymerase chain reaction, agarose gel electrophoresis for the analysis of these complex molecules and for disease diagnosis. | Format: Paperback | Language/Sprache: english | 60 pp.

Reviews

This book is definitely worth acquiring. Yes, it is enjoy, still an amazing and interesting literature. Its been written in an remarkably basic way and is particularly simply soon after i finished reading through this pdf where actually changed me, affect the way in my opinion. -- Murray Marquardt

Totally among the best publication I have ever go through. This really is for all those who statte that there had not been a well worth studying. I am just very happy to let you know that this is actually the very best pdf we have go through inside my very own daily life and could be he very best ebook for actually. -- Miss Audra Moen
