A 3D VISUALIZATION TEACHING-LEARNING TRAJECTORY FOR ELEMENTARY GRADES CHILDREN

Springer-Verlag Gmbh Apr 2016, 2016. Taschenbuch. Book Condition: Neu. 236x162x7 mm. Neuware - This monograph describes the development and use of a 3D visualization teaching-learning trajectory for elementary age learners. Using design research principles, the authors developed this trajectory using the NCTM recommendations and the Spatial Operational Capacity (SOC) theoretical framework to guide lesson development. The SOC framework utilizes actual 3D models, 2D and abstract representations of the actual models, and, a dynamic computer interface, the Geocadabra Construction Box, which...

Reviews

Merely no words and phrases to spell out. It is actually written in basic words and phrases instead of difficult to understand. Your way of life span will probably be enhanced as soon as you complete reading this article ebook.

-- **Lauren Quitzon**

I just started out looking over this ebook. It was written extremely perfectly and useful. You are going to like the way the blogger publishes this book.
