

Mining and Control of Network Traffic by Computational Intelligence (Hardback)

Filesize: 6.98 MB

Reviews

Extremely helpful for all class of people. It is probably the most incredible ebook i actually have go through. I discovered this publication from my dad and i recommended this ebook to discover.

MINING AND CONTROL OF NETWORK TRAFFIC BY COMPUTATIONAL INTELLIGENCE (HARDBACK)

To save **Mining and Control of Network Traffic by Computational Intelligence (Hardback)** eBook, make sure you access the link beneath and save the ebook or gain access to other information which are related to MINING AND CONTROL OF NETWORK TRAFFIC BY COMPUTATIONAL INTELLIGENCE (HARDBACK) book.

Springer-Verlag Berlin and Heidelberg GmbH Co. KG, Germany, 2011. Hardback. Condition: New. 2011 ed.. Language: English . Brand New Book. As other complex systems in social and natural sciences as well as in engineering, the Internet is hard to understand from a technical point of view. Packet switched networks defy analytical modeling. The Internet is an outstanding and challenging case because of its fast development, unparalleled heterogeneity and the inherent lack of measurement and monitoring mechanisms in its core conception. This monograph deals with applications of computational intelligence methods, with an emphasis on fuzzy techniques, to a number of current issues in measurement, analysis and control of traffic in the Internet. First, the core building blocks of Internet Science and other related networking aspects are introduced. Then, data mining and control problems are addressed. In the first class two issues are considered: predictive modeling of traffic load as well as summarization of traffic flow measurements. The second class, control, includes active queue management schemes for Internet routers as well as window based end-to-end rate and congestion control. The practical hardware implementation of some of the fuzzy inference systems proposed here is also addressed. While some theoretical developments are described, we favor extensive evaluation of models using real-world data by simulation and experiments.
