Excerpt: .The word, however, seems rather too aptly and humorously to describe the very uncertainty that we have sought to avoid. Theoretically, there seems to be no reason why the plug should not endure infinitely but its construction involves many processes and its use in strange hands many uncertainties. It seems wise therefore, to limit ourselves to the terms of our usual contract calling for replacement of defective workmanship or material within one year after shipment. Price and advantages considered, a year of service makes the plug a really commercial article and there is every reason to expect a far greater life. Figure 1 shows a section of the starting plug applied to a Type IV engine. The resistor is a steel sheathed insulated nichrome conductor. At the lower end the conductor is brought thru the insulation and welded engines. We have made tests of...
