Prospecta Press. Hardcover. Condition: New. 160 pages. In this readable and beautifully illustrated book, Cary Fowler reminds us of our debt to the world of plants and our responsibility for forward-looking stewardship of the variety of plant life, especially of the genetic variety of those plants that are the foundation of global agriculture. It is a personal and passionate reminder that we should not take our reliance on the world of plants for granted, and that in a changing and unpredictable world, the only way to make sure that agriculture remains productive and is resilient for the future, is to ensure that it is adaptable. This book is a plea for the importance of diversity and the need for action to secure the future of plentiful and nutritious food for all. Along with water, food is a pre-requisite for our continuing human existence. The Svalbard Global Seed Vault is a key component of global efforts to secure the diversity of our most important crop plants to ensure that they meet our needs for the long term, and this book tells us the inside story of how the vault came to be. It is a more complex and nuanced story than the Doomsday Vault romanticized by the popular press, but in the end the Svalbard Global Seed Vault is an elegantly simple and pragmatic response to a pressing global need. It is an insurance policy for the future of global agriculture. And one that we hope will rarely need to be cashed in. This is an engaging book on a serious subject. The Svalbard Global Seed Vault began only a few years ago as a visionary concept. Today it is reality. Its importance for the long term is hard to overstate. If you doubt it, just stop for moment and reflect...
