

Computational Algebraic Geometry and Groebner Basis

By Mohammad Salah Uddin

LAP Lambert Academic Publishing Jul 2013, 2013. Taschenbuch. Condition: Neu. Neuware - Computational Algebraic Geometry (CAG) is a well-defined collection of the algebra of polynomial ideals, the geometry of affine varieties and wonderful implementations of algorithms. It describes algebraic geometry as a practical and experimental subject. CAG is mainly based on the development of Groebner Basis and the Buchberger Algorithm. A big contribution to the development of Groebner Basis was due to the implementation of the Buchberger Algorithm on the computer algebra systems Axiom, Cocoa, Mathematica, Maple, Macaulay, Reduce, etc. As an introduction to CAG, in this book we study some common questions in affine varieties and we show that computational techniques are much more informative and motivating than theoretical point of view. 52 pp. Englisch.

Reviews

Simply no words and phrases to spell out. it was writtern extremely perfectly and useful. I am easily could possibly get a satisfaction of looking at a composed publication.

-- Prof. Maudie Ziemann

It is not difficult in read through easier to comprehend. It is packed with knowledge and wisdom You may like just how the article writer write this pdf.

-- Kristy Hermann
