Createspace Independent Publishing Platform, United States, 2010. Paperback. Book Condition: New. 2nd. 250 x 202 mm. Language: English . Brand New Book. Much has been written for using Google SketchUp in the building shell and its relationship to the environment or the site. Less help has been provided to interior designers who work every day with materials, textures, lights and colors. Students need to know the available tools and how they can apply them in specific cases to this particular discipline. Fundamental concepts, ideas on how to create objects and interior spaces, tips and practical exercises are what this book offers. Rather than endless lines of explanatory text this hands-on book is a compendium of practical exercises that lead students to learn SketchUp from the perspective of the interior designer. This book focuses on the fundamentals for the interior design field and promotes independent study. A series of four books offer separate courses progressing in complexity. At the end of every course you will find practical exercises that will broaden your experience in the acquired knowledge. These resources enable students to think about how the knowledge can be applied to any situation. At the end of the four courses you will be able to express your ideas to others in a more efficient and attractive way. Training Course 4. How to communicate your ideas in a convincing way. Working with SketchUp interior models is completely different from creating models that can be seen only from the outside. You will learn how to show interior spaces by using various styles and sections, and by bringing in shadows and lighting. You will learn how to use scenes and, animations, export images, print perspectives and drawings in scale, export files to other programs, and import Autocad files.
