Excerpt: .small for small disturbances and have not been particularly useful in analyzing the nature and characteristics of the spring system. If a major seismic shock occurs near a spring system, however, major changes can be expected. Marler (1964) has described the many changes that occurred in the springs and geysers of Yellowstone Park as results of the Hebgen Lake earthquake of 1959. One major factor, among others, clearly was distance from the epicenter. GEOTHERMAL WELLS AND EFFECTS ON NATURAL VENTS WBIXS DRILLED BT PRIVATE INTERESTS The first gothermal well was drilled at Steamboat Springs about 1920. Before this time the Steamboat Resort had depended on hot water piped from nearby natural springs to supply the hot baths and for other uses. As shown by plate 4, however, all springs of the area are highly variable in behavior. A well was drilled near the resort to obtain a...
