

Hagenia abyssinica in insect pest control

By Gemechis Legesse Yadeta

LAP Lambert Academic Publishing Mrz 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - This book is a product of my MSc thesis. It presents the theoretical and practical aspects of insect pest management methods applied in the current agriculture. Botanicals have been an important part of the integrated pest management (IPM) systems. here, the famous plant (Hagenia abyssinica) that served for traditional medicine in East Africa to treat internal parasites and malaria was applied as botanical control against pea aphid (*Acyrtosiphon pisum*) and bean weevil (*Acanthoscelides obtectus*). As a traditional medicine it is still used to expel human tapeworm among the majority of Ethiopian societies. The flower and wood extracts of this plant significantly reduced the damage caused by these two important pests of pulse crops. 80 pp. Englisch.

Reviews

These types of ebook is the best book available. It really is written in easy terms instead of hard to understand. You will like just how the article writer created this book.

A must buy book if you need to add benefit. It can be really interesting through looking at the period of time. It has been designed in a remarkably simple way and it is only after I finished reading this publication by which in fact altered me, modified the way I believe.
