Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from First Principles of Agriculture The great importance of the practical element in education has gained almost universal recognition during the past few years, and to-day educators are practically unanimous in emphasizing its necessity. Both from utilitarian motives and in recognition of the value of applied knowledge as a disciplinary study, they are urging the introduction of studies which pertain to the life arid environment of the child. The mental exercise or discipline derived from such studies is much greater than is usually accredited to them, as the material of study is ever present, constantly stimulating the mind to activity. The latest demand is for the introduction of the Principles of Agriculture in the rural schools. There are special reasons for the introduction of this study. The education of the country boy and girl has been away from the farm and toward the factory and the city. The study of civics, of geography, of history and of biography has created ideals of greatness that find their expression only in city life. Even the so-called Nature Study has been largely sentimental and urban in its leanings. The result has been a continual and constantly increasing exodus of the most thoughtful and enterprising young men and young women of our rural districts to the city. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
