

Assessing Low-Carbon Development in Nigeria: An Analysis of Four Sectors (Paperback)

By -

World Bank Publications, United States, 2013. Paperback. Condition: New. New. Language: English . Brand New Book ***** Print on Demand *****.The Federal Government of Nigeria has adopted an ambitious strategy to make Nigeria the world's 20th largest economy by 2020. Sustaining such a pace of growth will entail rapid expansion of activity in key carbon-emitting sectors of the economy. In the absence of policies to accompany economic growth with a reduced carbon footprint, emission of greenhouse gases would more than double in the next two decades. By consolidating and synthesising the results of the sector-specific, in-depth analyses, volume 1 of this effort (Low-Carbon Development: Opportunities for Nigeria, 9780821399255) found options for Nigeria to achieve the development objectives of Vision 20:2020 and beyond, but stabilising emissions at 2010 levels, and with domestic benefits in the order of 2 percent of GDP. The present study, volume 2, is a collection of the technical reports on the four sectors of inquiry-agriculture and land use, oil and gas, power, and transport-that informed the preparation of the first volume. For agriculture and land use, the Government has set ambitious targets for increasing the domestic agricultural production six-fold by 2020. The study analyses the mitigation...
