Excerpt from Syllabus of Illustrated Lecture on Essentials of Successful Field Experimentation The experiment station is the distinguishing feature of the new agriculture. It stands for organized research in agriculture, for the concentration of the knowledge and skill and energy of the entire State on the solution of the unsettled problems of the farm. The experiment station is created to do things which are impossible to the ordinary farmer. It is furnished with costly equipment and is conducted by men trained in the methods of scientific research, who are made free from other cares in order that they may devote their undivided energies to helping the farmer. But while there are some things which can only be done by the aid of such an equipment as that of the experiment station, there are other things which the station can never do, and the farmer who profits most by the work of the experiment station is he who is him self an experimenter. It is the province of the experiment station to discover and forma late general principles. The application Of these principles must...
