Excerpt: .with one another to discover similarities and identities. 7. Oral number work should predominate in primary grades. 8. Written work at the board and at the seats should acquaint the children with the figures and symbols of operation. McMurry, Special Method in Arithmetic, Macmillan, pp 140-141. CHAPTER V. Arithmetic in the Intermediate Grades. In the intermediate grades we will consider grades fourth, fifth and sixth. The fourth grade is outlined in the Wheeler Text, Primary Book, last portion. The work for the fifth and sixth grades is found in the Wheeler Intermediate Book. In the discussion of the work for the intermediate grades we may begin to consider the teaching of the arithmetical processes and their application in a more serious manner. The student in the intermediate grades should master most of the arithmetical processes and operations especially those of a fundamental nature. In these grades the student possesses the ability to begin to generalize and the teacher may apply inductive methods by the use of concrete examples. The teacher may inductively derive and formulate definitions and rules which the student utilizes in later work. Arithmetical processes and their modes of expression are the means by which we give quantitative interpretation to the large mass of things and to the active forces in the physical world. The teacher should lead the pupils constantly to measure, compare and simplify number relations. The need of arithmetic in the common affairs of life and the close...
