Mount San Antonio College/Philosophy Group. Paperback. Condition: New. 78 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. Google Glasses are the most talked about new gadget in the first part of 2014 and for good reason. They represent how intelligent devices are rapidly evolving to become embedded objects in our day to day lives. Already almost anybody with a smart phone (android or apple or otherwise) wont leave home without one and if they do somehow forget their intelligent devices they will invariably turn their cars around to go secure it. This should give us a preview of what the future has in store for us, even if Luddites be damned. Everything and everyone is turning psychic and the hardware/software divide will quickly become lost in a mind meld that even Spock couldnt prefigure. Google glasses is merely an awkward transition from a partial smart augmentation (the iPhone or Android device is in our pocket, or our hands, or close up to our face) to a fully implanted one (from contacts to nanotechnological seed implants). What this portends is an unprecedented transparency of human cognition and connectivity. Ken Wilber has long argued that human evolution will move from the merely rational to the psychic, even though his prophetic trajectories were mistakenly of a wholly mystical kind. The psychic canopy of the future is not built on yogic visionaries, but on the nuts and bolts of hard core physics. The psychic template, even though it may seem to be imputing a spiritual realm, is algorithmically layered (level by level) upon electronic data streams prefigured in the laws of quantum mechanics. And, yet, the larger question remains: are homo sapiens ready for full and uncensored frontal lobe exposure This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
