It is manifest that the number of primes is infinite, since the series l + 4 + J + +-t--fa, c. is infinite. Though we cannot find an algebraic formula which contains only primes, nor one which contains all such numbers, or is their general law, yet we have some formulae which are remarkable for the multitude of primes which they contain. Thus, if in the formula x2--x + 41, we take x = 0, 1, 2, 3, 4, c. we shall have 41, 43, 47, 53, c. of which the first 41 terms are primes; in the formula x2 + x+ 17 the first 17 terms are primes; and in the formula 2z2 + 29, the first 29 terms are primes. The expression 2a;+ 1, according as x is even or odd, contains the two forms 4 + 1 and 4a;--1, two principal divisions of prime numbers; the form 4a;+1 may be subdivided into 8a;-f-1 and 8a;--3, and the form 4a;--1, into 8a;--1 and 8a; + 3, so that all the primes may be reduced to these four forms. The forms 6z + 1 according as x is even or odd, give, in reference to 12, the four forms 12a;+ 1, 12a;-f-5, 12a;--5, and 12a;--1, each of which contains an infinite number of primes. In general, if...
