Fraunhofer Verlag Mai 2012, 2012. Taschenbuch. Condition: Neu. Neuware - This thesis presents three models for transparent façade components: a detailed physical model including a sophisticated optical simulation, a simplified model for transparent façade components and a black-box model for passive façades. The models are validated by extensive measurements and used for whole-year simulations to estimate the primary energy savings of transparent solar thermal façade collectors. 114 pp. Deutsch.
