

Heuristically Driven Search Methods for Topology Control in Directional Wireless Hybrid Networks

Filesize: 9.44 MB

Reviews

This ebook can be well worth a go through, and far better than other. Sure, it can be enjoy, continue to an interesting and amazing literature. I am just delighted to tell you that this is the greatest book i have got study within my personal daily life and could be he very best publication for actually.

(Miss Susana Windler DDS)

HEURISTICALLY DRIVEN SEARCH METHODS FOR TOPOLOGY CONTROL IN DIRECTIONAL WIRELESS HYBRID NETWORKS

DOWNLOAD

To get **Heuristically Driven Search Methods for Topology Control in Directional Wireless Hybrid Networks** eBook, remember to click the hyperlink under and save the file or get access to additional information that are in conjunction with HEURISTICALLY DRIVEN SEARCH METHODS FOR TOPOLOGY CONTROL IN DIRECTIONAL WIRELESS HYBRID NETWORKS ebook.

Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x6 mm. This item is printed on demand - Print on Demand Neuware - Information and Networked Communications play a vital role in the everyday operations of the United States Armed Forces. This research establishes a comparative analysis of the unique network characteristics and requirements introduced by the Topology Control Problem (also known as the Network Design Problem). Previous research has focused on the development of Mixed-Integer Linear Program (MILP) formulations, simple heuristics, and Genetic Algorithm (GA) strategies for solving this problem. Principal concerns with these techniques include runtime and solution quality. To reduce runtime, new strategies have been developed based on the concept of flow networks using the novel combination of three well-known algorithms; knapsack, greedy commodity filtering, and maximum flow. The performance of this approach and variants are compared with previous research using several network metrics including computation time, cost, network diameter, dropped commodities, and average number of hops per commodity. The results conclude that maximum flow algorithms alone are not quite as effective as previous findings, but are at least comparable and show potential for larger networks. 104 pp. Englisch.
