

The Multivariate Social Scientist: Introductory Statistics Using Generalized Linear Models (Paperback)

By Graeme Hutcheson, Nick Sofroniou

SAGE Publications Inc, United States, 1999. Paperback. Condition: New. Language: English . Brand New Book. Starting from simple hypothesis testing and then moving towards model-building, this valuable book takes readers through the basics of multivariate analysis including: which tests to use on which data; how to run analyses in SPSS for Windows and GLIM4; how to interpret results; and how to report and present the reports appropriately. Using a unified conceptual framework (based around the Generalized Linear Model) the authors explain the commonalities and relationships between methods that include both the analysis of categorical and continuous data.
