REPRESENTATION AND RECOGNITION IN VISION (HARDBACK)

MIT Press Ltd, United States, 1999. Hardback. Condition: New. Language: English . Brand New Book Shimon Edelman bases a comprehensive approach to visual representation on the notion of correspondence between proximal (internal) and distal similarities in objects. Researchers have long sought to understand what the brain does when we see an object, what two people have in common when they see the same object, and what a seeing machine would need to have in common with a human visual system...
