Not illustrated. 1871 Excerpt: .any two eminent authors fully agree in their ideas on this subject. And the larger one s experience and field of observation has been, the more difficult the task of reconciling and correlating all the phenomena has been found to be. Hence, the theories have mostly come from those geologists whose training has been chiefly chemical, and who have looked at nature almost exclusively through the bars of their laboratory windows. Those whose powers of observation have had the widest field for their exercise have had the most vivid perception of the complicated character of the phenomena of volcanic action, and have usually preferred to leave their correlation to others. The work of Richthofen, the title of which was among those placed at the head of a preceding article on volcanoes, forms an exception to the above remarks, since its author has had an uncommon, in...
