Reviews

The very best publication i at any time study. It really is basic but shocks inside the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Marlin Swift)

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 1994. Mixed media product. Book Condition: New. 277 x 216 mm. Language: English . Brand New Book. This workbook is to accompany *Statistics: Concepts and Applications* by H. Frank and S. Althoen. It provides tutorial and examples as well as a comprehensive guide to using the computer software package ASP (an IBM disk containing this program is enclosed in the book). *Statistics: Concepts and Applications* is a classical general statistics text written in modern voice. The authors bring mathematical, theoretical and conceptual integrity to a body of topics and techniques that is appropriate to a first course in statistics and do so in a way that is accessible to students whose mathematical preparation does not go beyond the standard curriculum for college algebra. The informal, conversational prose delivers conceptual richness and advances a quiet subtext of mathematics instruction that achieves a high level of mathematical rigour. The text presents a thorough, step-by-step development of fundamental principles.
