The Ultimate Theory: The Perfect Description of the Universe

By Geoffreyson Khamala

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 138 pages. Dimensions: 9.0in. x 6.0in. x 0.3in. Ever since the dawn of humanity, humans have attempted to fully comprehend and explain nature. However, orthodox science holds that not even the most sophisticated model is proficient enough to provide a perfect depiction of the universe. Indeed, no thought process thus far has ever managed to present social life, politics, economics, psychology, technology, the material world and terrestrial space as a seamless whole. The Ultimate Theory is a dialogue on the nature of reality with the worlds foremost scientists. The theory almost perfectly explicates the nature of the universe in a single theoretical framework by demonstrating that the subject matter of science is spatial (non-Euclidian space) and non-spatial dimensions (inherent properties of the physical world). We are one with nature. The physical world is extended in non-physical realms in what can be described as connectedness. Hence, in addition to the familiar threedimensional spatial world, there are twelve (12) non-spatial relations namely gravity, electromagnetism, strong nuclear interaction, weak nuclear interaction, dark matter, dark energy, mental faculties, senses, emotions, time, life and death. Spatial and non-spatial dimensions are the reference frames...
