## Geology and Mineral Resources of the Hennepin and La Salle Quadrangles Volume 37

By Gilbert Haven Cady

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .that of the strata below, such as the La Salle limestone, being conspicuous for the great numbers of gastropods and lamellibranchs and the numerous sharks teeth. Also embedded in the limestone are small pebbles of greenish, igneous rocks and quartz. Tertiary (?) System Neither Mesozoic nor Tertiary rocks are found in place in the quadrangles, but the basal part of the glacial drift in several places contains many wellrounded pebbles of quartz. Here and there are found small deposits of quartz and chert gravel containing some pebbles of igneous rock, all colored a dark red by iron oxide. Such a deposit is found under the more recent gravels at Spring Valley in the SW. 4 sec-35, Hall Township. At this place there are 6 to 10 feet of greatly oxidized quartz pebbles lying above the Coal Measures strata and underlying a bed of silt or loess....
