Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from **Studies Upon Leprosy, Vol. 33: A Statistical Study of an Endemic Focus of Leprosy; A Palliative Treatment for Leprous Rhinitis** Much has been written about the endemic focus of leprosy which has existed in the Hawaiian Islands for about half a century, but until the completion of the thoroughgoing analysis of the official records of the Hawaiian Territorial Board of Health which appears in the following pages, the rich epidemiological data upon lepra yielded by this focus of the disease have never received the careful treatment which they deserve. The computations of this report have been checked and rechecked and are, we believe, as accurate as is possible within the limitation prescribed by the basic data and the percentage of error inherent in such work. The most striking thing about this table is the surprising variation in the number of lepers segregated each year. It is not possible to understand the variation in the annual number of lepers segregated without some knowledge of the political history of the Territory. From the beginning of our table until 1893 the form of government was monarchical, the native ruler being more or less under the influence of foreign advisers. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
