

## Methods in Stream Ecology

By -

Elsevier Science Publishing Co Inc, United States, 2007. Paperback. Book Condition: New. 2nd Revised edition. 270 x 192 mm. Language: English . Brand New Book. Methods in Stream Ecology provides a complete series of field and laboratory protocols in stream ecology that are ideal for teaching or conducting research. This new edition is updated to reflect recent advances in the technology associated with ecological assessment of streams, including remote sensing. In addition, the relationship between stream flow and alluviation has been added, and a new chapter on riparian zones is also included. With a student-friendly price, this Second Edition is a key for all students and researchers in stream and freshwater ecology, freshwater biology, marine ecology, and river ecology. This text is also supportive as a supplementary text for courses in watershed ecology/science, hydrology, fluvial geomorphology, and landscape ecology. It includes: exercises in each chapter; detailed instructions, illustrations, formulae, and data sheets for in-field research for students; taxonomic keys to common stream invertebrates and algae; website with tables; and, link from chapter 22: Fish Community Composition to an interactive program for assessing and modeling fish numbers.
