

## Basic Fundamentals in Hearing Science (Hardback)

By Tony L. Sahley, Frank E. Musiek

Plural Publishing Inc, United States, 2014. Hardback. Book Condition: New. 257 x 180 mm. Language: English . Brand New Book. Basic Fundamentals in Hearing Science is a practical textbook written primarily for college undergraduates preparing for graduate programs in speech-language pathology or audiology. Using Newtonian physics, the authors present a novel approach to the subject of hearing science enabling students to develop their understanding of the subject while building their knowledge of scientific concepts as they move through the text. Students progress from the basics to more difficult concepts in a graduated process. The text encourages thinking and problem solving rather than learning by rote memorization and clarifies obscure concepts in a writing style that promotes greater understanding and comprehension. Pedagogical elements include key terms listed for each chapter, bulleted chapter summaries, and review questions at the end of each chapter. For undergraduate hearing science students without hard science backgrounds, this text aims to decompress and facilitate the comprehension of difficult and often cumbersome concepts in order to master the basic concepts in hearing science. This textbook is also a useful supplemental or recommended reference for speech and hearing combined courses that require more coverage of hearing science than currently...
