

Towards Solving the Social Science Challenges with Computing Methods

By Biljana Mileva Boshkoska

Peter Gmbh Lang Mai 2015, 2015. Taschenbuch. Condition: Neu. Neuware - Computational Social Science is an interdisciplinary field where social science questions are investigated with modern computational tools. The book provides insight into different social problems and calls for new practices offered by computational social science, discussing methods for efficient management of complex engineering design, cybersecurity and the prediction of malicious threads of information systems. It is also a study of awareness of privacy in social networks, prosodic modelling for speech synthesis, the structure of co-occurrence networks and cloud applications. The authors propose an extension of synergy models in IMC environment to n-communication channels, and identification and evaluation of knowledge management through information system analysis. 133 pp. Englisch.
