Forgotten Books. Paperback. Condition: New. This item is printed on demand. 68 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. Excerpt from Highlights of Natural Resources Management, 1991. During 1991, the Natural Resources Program throughout the National Park Service made several significant achievements. In some cases, activities of past years came to fruition. For example, several years of effort that began with a regional study of winter haze conditions at Grand Canyon culminated in a negotiated agreement to reduce emissions at the Navajo Generating Station. In other cases, we set a course for years to come. The previously planned Global Change Program achieved a solid foundation with FY 1991 funding and additional FY 1992 funds. Late in the year, with FY 1992 funding, the first year of the planned 10-year Inventory and Monitoring Program was initiated, with selection and funding of four prototype monitoring parks and of a full-time coordinator to oversee the program. In addition to successful initial implementation of these programs, the groundwork was developed for future improvements. The Vail symposium, held in conjunction with the 75th Anniversary of the National Park Service, coincided with internal Natural Resource program evaluation and planning efforts to start strategic planning for the future. These are exciting times to be a part of managing the natural resources of our parks. The positive changes brought about in key recent issues—the Everglades water quality law suit and reductions of emissions affecting the Grand Canyon and Shenandoah, for example—have provided very visible models of the need for and value of resource data in protecting park resources. We do not yet have the ability to fully accomplish the National Park Service's resource preservation functions. Improvements and advancements in the structure, commitment, tools, and techniques of the agency's natural resource program are needed. However, the many accomplishments...
