## **COMPUTATIONAL FLUID DYNAMICS 2002**

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the Second International Conference on Computational Fluid Dynamics, ICCFD, Sydney, Australia, 15 19 July 2002 | We are pleased to present the Proceedings of the Second International Conference on Computational Fluid Dynamics held at the University of Sydney, Australia, from July 15 to 19, 2002. The conference was a productive meeting of scientists, mathematicians and engineers involved in the computation of fluid flow. Keynote lectures were presented in the areas of optimisation, algorithms, turbulence and bio-fluid mechanics. Two hundred and fifty abstracts from many countries were received for con sideration. The executive committee, consisting of A. Lerat, M. Napolitano, J.J. Chattot, N. Satofuka and myself, were responsible for the selection of papers. Each of the members had a separate subcommittee to carry out the evaluation. One hundred and seventy papers were selected of which one hundred and fifty two were presented at the conference. All papers that appear in the proceedings have been peer reviewed by a panel of experts (with a minimum of two for every paper) before publication. The conference was attended by 160 delegates with a minimum of late with drawals. The informal and friendly atmosphere provided by the university sur roundings was highly appreciated, and the technical aspects of the conference were stimulating. It is appropriate here to thank Alain Lerat, the retiring secretary of the international scientific committee of the conference. We also wish to welcome J. J. Chattot who is the incoming secretary. | I Invited Lectures.- A Newton-Krylov Algorithm for Aerodynamic Analysis and Design.- Studying Bypass Transition to Turbulence by Computer Simulation.- A Parallel Non-Staggered Navier-Stokes Solver Implemented on a Workstation Cluster.- Towards Computational Biomechanics Based Cardiovascular Medical Practice.- II Algorithms.- Uncertainty Quantification in CFD Simulations: A Stochastic Spectral Approach.- A Computational Me
