EFFICIENT FREQUENCY DOUBLING OF NEAR-INFRARED DIODE LASERS USING QUASI PHASE-MATCHED WAVEGUIDES

Cuvillier Verlag Mai 2015, 2015. Taschenbuch. Book Condition: Neu. 208x148x15 mm. Neuware - Single-pass frequency doubling of near-infrared (NIR) diode lasers in nonlinear bulk crystals allows to realize compact lasers in the green spectral region, offering continuous-wave (CW) laser radiation characterized by a high spectral brightness. In order to increase the efficiency of such laser systems, the application of quasi phase-matched waveguide structures instead of bulk crystals is investigated theoretically and experimentally. In particular, a complemented study of second-harmonic generation...

Reviews

This pdf may be worth acquiring. It can be written in easy words and phrases and not hard to understand. I am pleased to tell you that this is basically the finest book I have read through during my personal existence and might be the greatest pdf for at any time.

-- **Jeffry Tromp**

Absolutely among the best book we have ever study. It is actually written in easy words instead of hard to understand. I found out this publication from my dad and dad encouraged this book to find out.
