

## Trends in Food Processing & Preservation

By Asha Kumari

Enkay Publishing House 0. Hardcover. Condition: New. First edition. Food processing and preparation activities cover three main fields: 91) the preservation of foods by (a) modern methods such as refrigeration, canning and irradiation, and (b) traditional methods such as drying, salting, smoking and fermentation; (2) the development of protein-rich foods; (3) food additives. It was noted that several Divisions, including those of Fisheries, Animal Production and Health, Plant Production and Protection, were engaged in food technology activities in their respective fields of interest. Table of Contents Preface Introduction Organic food production and processing Ozone in food processing applications The food and farming transition The Role of traditional food processing Technologies Preserving foods through high pressure processing Solar drying technology for Food preservation Bacertiocin-based strategies for food biopreservation The impact of consumer demands and trends on food processing Product development in food processing industry Quality management systems in small and medium food processing enterprises The Potential for upgrading traditional fermented foods through biotechnology Latest Trends in food processing using extrusion technology Food preservation: Past, Present and Future Bibliography Index Printed Pages: 0.
