Createspace. Paperback. Condition: New. This item is printed on demand. 184 pages. Dimensions: 11.0in. x 8.5in. x 0.4in. This volume of selected readings and the handbook it accompanies have been developed to provide participants in the building process at the local, state, and regional levels with the information they need to adequately address the potential effects on their communities of using new or improved seismic safety design provisions in the development of regulations for new buildings. A number of these papers were prepared specifically for the BSSC study and several were presented at the BSSC committee meetings with building process participants. Several other papers were originally presented at a 1984 FEMA workshop but were not published. Included are: An estimate of the impact of the NEHRP Recommended Provisions on design and construction costs developed for the BSSC study; Descriptions of the seismic hazard in various areas of the United States developed for the BSSC study; Explanations of seismic safety codes; Descriptions of...
