Reviews

The very best ebook i ever study. It really is rally fascinating throug reading throug period of time. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Coleman Kreiger)

ROBOTICS AND FACTORIES OF THE FUTURE '87

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the Second International Conference San Diego, California, USA July 28-31, 1987 | The papers presented at the Second International Conference on Robotics and Factories of the Future held in San Diego, California, USA during July 28-31, 1987 are compiled in this volume. Over two hundred participants attended the conference, made technical presentations and discussed about various aspects of manufacturing, robotics and factories of the future. The number of papers published in this volume and the number of unpublished presentations at the conference indicates the evidence of growing interest in the areas of CAD/CAM, robotics and their role in future factories. The conference consisted of five plenary sessions, twenty three technical sessions, workshops, and exhibits from local industries and educational institutions. I wish to acknowledge with many thanks the contributions of all the authors who presented their work at the conference and submitted the manuscripts for publication. It is also my pleasure to acknowledge the role of keynote, banquet, and plenary sessions speakers whose contributions added greatly to the success of the conference. My sincere thanks to all session chairmen. I wish that the series of the International Conferences on Robotics and Factories of the Future which was initiated in 1984 in Charlotte, North Carolina will have a major impact on the use of robots and computers in the automated factories of the future. | Invited Lectures.- Elements of Effective CIM.- Intelligent Task Automation Manufacturing System.- Robotic Manufacture of Hazardous Substances.- Robotics and Factories of the Future as Applied to Large Mechanical Products.- Microcomputer Applications for CAD/CAM in Engineering Education.- Planning of Automation.- Methodology of Assembly Automation: A New Approach.- The Application of the Second Law Technique for the Prediction of Trends in the Development of a Factory of the Future.- A Coherent...
