Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Claude Robert Cloninger, M.D. (born April 4, 1944) is a psychiatrist and geneticist noted for his pioneering research on the biological, psychological, social, and spiritual foundation of both mental health and mental illness. He is Wallace Renard Professor of Psychiatry, Professor of Psychology and of Genetics, and Director of the Center for Well-Being at Washington University in St. Louis. Cloninger is a member of the evolutionary, neuroscience, and statistical genetics programs of the Division of Biology and Biomedical Sciences at Washington University, and is recognized as an expert clinician in the treatment of general psychopathology, substance dependence, and personality disorders. Cloninger is best known for his ground-breaking research on the genetics, neurobiology, and development of personality and personality disorders. He identified and described heritable personality traits predictive of vulnerability to alcoholism and other mental disorders in prospective studies of adoptees reared apart from their biological parents.
