

Heredity and Environment in the Development of Men (Classic Reprint)

By Edwin Grant Conklin

Forgotten Books. Paperback. Condition: New. This item is printed on demand. 382 pages. Dimensions: 9.0in. x 6.0in. x 0.8in. Excerpt from Heredity and Environment in the Development of Men. The origin of species was probably the greatest biological problem of the past century; the origin of individuals is the greatest biological subject of the present one. The many inconclusive attempts to determine just how species arose led naturally to a renewed study of the processes by which individuals came into existence, for it seems probable that the principles and causes of the development of individuals will be found to apply also to the evolution of races. As the doctrine of evolution wrought great change in prevalent beliefs regarding the origin and past history of man, so present studies of development are changing opinions as to the personality of man and the possibilities of improving the race. The doctrine of evolution was largely of theoretical significance, the phenomena of development are of the greatest practical importance; indeed there is probably no other subject of such vast importance to mankind as the knowledge of and the control over heredity and development. Within recent years the experimental study of heredity and development has led to...
